“Brock White Company Announces New Minot Branch”

Bismarck, ND – May 6, 2010

Brock White Company is pleased to announce the May 10th opening of a new branch office in Minot, ND. The new branch will operate in close association with their current branch in Bismarck. Brock White has served the North Dakota construction market since they started business in 1954 and opened a Bismarck branch office in 1982 with the acquisition of concrete forming company FormAll. In 1986, Brock White opened a branch office in Fargo. The Minot office will carry Brock White’s full line of construction materials including concrete and masonry supplies, geotextiles and erosion control materials, decorative concrete products, forming hardware and ICFs. As well, the Minot location will tailor its products to service the needs of the oilfield market. The daily operation of the Minot branch will be run by Clark Jandt, LEED AP, a Beach, ND native and a longtime Brock White sales and technical representative.

“We’ve proudly served North Dakota for well over 50 years and are looking forward to expanding our coverage into this growing market.”

- Richard Garland, President, Brock White Co.

The contact information for the new branch is below. The hours of operation will be 7:00 am to 4:30 pm, Monday through Friday.
