

GLOBAL SAFETY NETWORK LAUNCHES NEW SERVICE

GlobalTRAX release date Jan 15, 2010.

Global Safety Network announces the release of GlobalTRAX

January 15, 2010, Grand Forks, North Dakota

Global Safety Network, Inc., an industry leader in risk management services, announces the implementation and availability of its newest product "GlobalTRAX". This new service is a web-based file management tool for compliance related functions such as (but not limited to); DOT regulatory driver files and Human Resource related documents. GlobalTRAX can be customized to meet your company's unique needs.

Chris Greenberg, President of Global Safety Network, championed the service as; "...an exciting opportunity for companies that are interested in outsourcing their file management related functions but still desire a hands-on approach. GlobalTRAX will alert you when your documents are out of compliance so you can rest easy!"

Global Safety Network provides individualized consulting and support for employee screening and risk management issues and currently has clients across the USA. Global Safety Network is headquartered in Grand Forks, North Dakota. The company is client-service driven and offers a variety of services consolidated through its unique vendor management organization. They can be found on the web at: www.globalsafetynetwork.com
